- j. Precipitated sera for group differentiation of streptococci.
 - k. "Frei'schej antigen".
 - l. Abortus Bangi test paste ("Testpaste").
 - m. Rh. sub groups sera DEC cc (sic).
4. Professor Dr. Sartorius added that he had not taken into account the production of veterinary bacteriological preparations and sera, but considered that the production of other blood group sera and extracts was quite sufficient for current needs.
